

TELESCOPIC GATE PACK

4 TO 15M
GATES

OPENS
INTO HALF
THE GATE
LENGTH

Designed to open into half the space needed by regular sliding gates, Telescopic Gate Packs let you fit a sliding gate where it may not normally be possible.

Four Pack sizes to suit openings between 4-15m makes Telescopic suitable for cramped inner-city homes with narrow yards, to extra-wide industrial driveways.

- > Easy to install
- > Opens and closes at 2x the speed of a standard sliding gate
- > Safest Telescopic gate available
- > No special tools or training needed
- > Can avoid installing complicated swing gate systems

Top Guide

MOTOR SELECTION

Because telescopic gates are faster they need a more powerful motor.

The extra load created by the speed increases the effective gate weight (EGW) of a single leaf by 5x its weight. This means a telescopic gate needs a motor with manufacturers rating of 5x the single leaf's weight.

E.g. A single 200kg telescopic leaf needs a motor rated over 1000kg.
